DETAILED ACTION

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8, 10-11, 13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant has not sufficiently pointed out where the new (or amended) claim is supported, nor does there appear to be a written description of the claim limitation "fused" in "saturated fused polycyclic hydrocarbon moieties" in the application as filed.

The only passage cited by applicants is page 6, lines 10-18, which is as follows:

"The saturated polycyclic moieties may be present in groups pending from monomers making up at least a portion of the backbone of the polymer or may themselves be present as part of the polymer backbone (e.g., in the case where a cyclic olefin monomer is used in the polymer). The saturated polycyclic moieties are preferably pendant from acrylate monomers (e.g., an acrylate or methacrylate) as part of an ester group. The saturated polycyclic moieties preferably contain at least 7 carbon atoms, more preferably about 10 to 20 carbon atoms. Examples of such moieties are norbornyl, isonorbornyl, adamantyl, etc."

Art Unit: 1752

The word "fused" is not found here. The genus of fused polycyclic moieties is not explicitly set forth here. Applicants have not explained where the passage supports such a genus.

3. Claims 12 and 14-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected groups, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 7.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
